AUTUMN LAWN PLAN

MAR–MAY *build the roots and get it ready for winter*

Start when: Nights cooling down · Growth slowing · Leaves dropping — *Usually Mar to May. Feed before the soil drops below 14°C.*

■ **Do it now** ▨ **If needed** · or still fine ▢ **Not now**

	MARCH		APRIL		MAY		
	EARLY	LATE	EARLY	LATE	EARLY	LATE	TIP
LAWN JOBS DIY							*Fix the soil while it can still recover*
AERATE — if hard or water pools	■	■	▨				Early autumn, while it can still recover.
TOP DRESS — if bumpy	■	■	▨				After aerating. About 10 mm, before growth slows.
CLEAR LEAVES — and water less		▨	■	■	■	■	Leaves smother grass. Water only when it needs it.
FEED AUTUMN PACK							*Feed early, before the soil cools · Kelp Kick is an add-on*
TURF TUKKA — year-round granular	FEED	■	▨				Before soil drops below 14°C. Earlier down south.
LAWN LAGER — liquid feed			TOP-UP		▨		Every 4–6 weeks while soil stays above 14°C.
WET WIZARD — wetting agent	WITH FEED	▨	▨				With the feed, so autumn rain soaks in deep.
KELP KICK — liquid kelp · add-on	■	▨		■			Coming out of summer, then every 6–8 weeks as it cools.
WEEDS, BUGS & DISEASE WEED & PEST							*Full details on the Weed & Pest Calendar*
MULTI TURF — bindii & clover	▨	▨	■	■	■	■	Weeds are young and easy to kill.
TEMPRA — nutgrass	▨	▨	▨	▨			Mar–Apr still works while it's green.
PRYNOVA — grubs & caterpillars	▨	▨	▨	▨			Mar–Apr: still on for caterpillars.
FIVESTAR — beetles & armyworm	■	■	▨	▨	▨	▨	Armyworm and webworm. Spray when you see them.
CHLORTAN — lawn fungus	■	■	▨	▨	▨	▨	March is still fungus weather. Apr–May after rain.

AUTUMN FEED

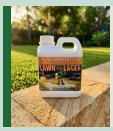

HOW MUCH, HOW OFTEN

TURF TUKKA
Year-round granular · N9-P4-K5 · 5 kg

RATE	COVERS	HOW OFTEN
4 kg per 100 m²	Up to 125 m²	Every 8–10 weeks

Spread on a dry lawn, then water in well.

LAWN LAGER
Liquid fertiliser · N10-P1-K6 · 1 L

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	Every 4–6 weeks

Mix into 5–10 L of water. Water in lightly, about 10 mm.

WET WIZARD
Wetting agent · 1 L

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	6–8 weeks or when dry

Apply first, then spread Turf Tukka straight after.

KELP KICK
Liquid kelp · not a fertiliser · 1 L · add-on

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	Every 6–8 weeks as it cools

Shake well. Mix into 4–8 L of water. Cool of the day, water in lightly.

AUTUMN DIY JOBS

IN THIS ORDER

1. **AERATE** — Ground rock-hard or water pooling? Fork or hollow-tine the worst spots while it's still growing.
2. **TOP DRESS** — Bumpy? Spread about 10 mm of sand or soil mix, leave the green tips showing, water in.
3. **FEED** — Wet Wizard, then Turf Tukka, watered in. Get it down before the soil drops below 14°C.
4. **SPRAY WEEDS** — Autumn weeds are young and easy to kill. Spray Multi Turf on a calm, dry day.
5. **MOW HIGHER** — Raise the mower as growth slows. More leaf stores more energy for winter.
6. **CLEAR LEAVES & WATER LESS** — Rake up fallen leaves. Wet grass and cold nights bring disease, so only water when it needs it.

THE YEAR-ROUND LAWN PLAN — *Get all four free at prolawnsau.com*

SPRING · SUMMER · **AUTUMN** · WINTER

MISSED THE WINDOW? Soil already under 14°C? Skip the granular and use Lawn Lager for colour. Keep on top of weeds and feed again in spring.

Always read the label before use and apply as directed. Timing suits most of southern and eastern Australia.
