SPRING LAWN PLAN

SEP-NOV

wake it up, feed it, and get ahead of summer

Start when:

Soil 14°C or warmer

Grass greening up

First mow is due

Usually late Aug to Oct. Earlier up north, later down south.

☐ Do it now

☐ If needed - or still fine

☐ Not now

SEPTEMBER

EARLY

TIP

LAWN JOBS

DIY

The jobs that set the lawn up for summer

WATER MORE

as it warms up

Deep and less often. Up the drinks as the days warm.

DETHATCH

if spongy underfoot

Mid to late spring, while it can recover fast.

AERATE

if hard or water pools

Fork or hollow-tine the worst spots.

TOP DRESS

if bumpy

After dethatching or aerating. About 10 mm.

FEED

SPRING PACK

Granular feeds, liquid top-ups in between

WAKEY WAKEY

spring granular

1ST

2ND

1st feed once soil hits 14°C. 2nd feed 6-8 weeks later.

LAWN LAGER

liquid feed

TOP-UP

TOP-UP

Every 4-6 weeks, halfway between granular feeds.

WET WIZARD

wetting agent

BEFORE HEAT

Before the first hot spell, or when water runs off.

WEEDS & GRUBS

WEED & PEST

Full details on the Weed & Pest Calendar

MULTI TURF

bindii & clover

Hit bindii before the prickles set.

PRYNOVA

curl grubs

At egg hatch, usually mid-September.

FIVESTAR

black beetles

Knock beetles down before they lay eggs.

TEMPRA

nutgrass

Once it's up and growing, 5 cm tall.

SPRING FEED

HOW MUCH, HOW OFTEN

WAKEY WAKEY

Spring granular · N22-P4-K7 · 5 kg

RATE

2.5 kg per 100 m²

COVERS

Up to 200 m²

HOW OFTEN

Every 6-8 weeks

Spread on a dry lawn, then water in well.

LAWN LAGER

Liquid fertiliser · N10-P1-K6 · 1 L

RATE

200 mL per 100 m²

COVERS

Up to 500 m²

HOW OFTEN

Every 4-6 weeks

Mix into 5-10 L of water. Water in lightly, about 10 mm.

WET WIZARD

Wetting agent · 1 L

RATE

200 mL per 100 m²

COVERS

Up to 500 m²

HOW OFTEN

6-8 weeks or when dry

Mix into 5-10 L of water. Water in lightly, about 10 mm.

SPRING DIY JOBS

IN THIS ORDER

1 CLEAN UP

Rake out leaves, sticks and dead growth. Make the first mow a tidy, not a scalp.

2 MOW

Never take off more than a third. Start high and come down gradually. Couch & zoysia 15-30 mm, buffalo & kikuyu 30-50 mm.

3 WATER

Deep and less often: 10-15 mm a session, early morning. If a screwdriver slides in easily, it's had enough.

4 DETHATCH

Spongy underfoot? Scarify or rake it out. It looks rough for a week or two, then bounces back.

5 AERATE

Water pooling or ground rock-hard? Fork or hollow-tine the worst spots while it's growing.

6 TOP DRESS

Bumpy? Spread about 10 mm of sand or soil mix, leave the green tips showing, water in and feed.

SPRING

SUMMER

AUTUMN

WINTER

RUNNING LATE? Spring jobs still work into early summer. Do them in this order: clean up, fix the soil, feed, then water it in.
