SUMMER LAWN PLAN

DEC–FEB *feed it, water it deep, and keep it green through the heat*

Start when: Days over 30°C · Lawn growing fast · Mowing every week — *Usually Dec to Feb. Starts earlier up north.*

■ **Do it now** ▨ **If needed** · or still fine ▢ **Not now**

	DECEMBER		JANUARY		FEBRUARY		
	EARLY	LATE	EARLY	LATE	EARLY	LATE	TIP
LAWN JOBS DIY							*Keep it cool and growing through the heat*
WATER DEEP — early morning	■	■	■	■	■	■	Deep soaks beat a daily sprinkle. More in a heatwave.
MOW HIGHER — raise it a notch	■	■	■	■	■	■	Longer leaf shades the soil and holds water.
PATCH BARE SPOTS — turf or runners	▨	▨	▨	▨	■	■	Grows fastest now. Keep moist until it roots.
FEED SUMMER PACK							*Feed in the cool, water in every time · Kelp Kick is an add-on*
SLIP SLOP SPREAD — summer granular	1ST	▨			2ND	▨	Cool, moist soil. Water in straight after. 2nd feed 6–8 weeks later.
LAWN LAGER — liquid feed			TOP-UP			TOP-UP	Every 4–6 weeks. Morning or evening, never on a scorcher.
WET WIZARD — wetting agent	■		■		■		Every 4 weeks through summer, so every drop soaks in.
KELP KICK — liquid kelp · add-on	■		■		■		Every 4 weeks. Helps the lawn cop heat, dry spells and traffic.
WEEDS, BUGS & DISEASE WEED & PEST							*Full details on the Weed & Pest Calendar*
MULTI TURF — bindii & clover							Too hot. Lawn and weeds are stressed. Wait for autumn.
TEMPRA — nutgrass	■	■	■	■	■	■	Growing flat out. Best time to spray.
PRYNOVA — grubs & caterpillars	▨	▨	▨	▨	▨	▨	Grubs or caterpillars showing? Spray now.
FIVESTAR — beetles & armyworm	▨	▨	▨	▨	■	■	Feb: armyworm season starts.
CHLORTAN — lawn fungus	■	■	■	■	■	■	Warm and humid = fungus weather. Watch for patches.

SUMMER FEED

HOW MUCH, HOW OFTEN

SLIP SLOP SPREAD
Summer granular · N15-P4-K11 · 5 kg

RATE	COVERS	HOW OFTEN
2.5 kg per 100 m²	Up to 200 m²	Every 6–8 weeks

Spread on cool soil, then water in straight after.

LAWN LAGER
Liquid fertiliser · N10-P1-K6 · 1 L

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	Every 4–6 weeks

Mix into 5–10 L of water. Water in lightly, about 10 mm.

WET WIZARD
Wetting agent · 1 L

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	Every 4 weeks in summer

Mix into 5–10 L of water. Water in deeply.

KELP KICK
Liquid kelp · not a fertiliser · 1 L · add-on

RATE	COVERS	HOW OFTEN
200 mL per 100 m²	Up to 500 m²	Every 4 weeks

Shake well. Mix into 4–8 L of water. Cool of the day, water in lightly.

SUMMER DIY JOBS

IN THIS ORDER

1. **MOW HIGHER** — Raise the mower a notch and never take off more than a third. Longer leaf shades the roots.
2. **WATER DEEP** — 10–15 mm a session, early morning. Deep soaks beat a daily sprinkle. If a screwdriver slides in easily, it's had enough.
3. **FIX DRY PATCHES** — Water beading or running off? Wet Wizard first, then a deep soak.
4. **SHARPEN THE BLADE** — Torn tips go brown in the heat. A sharp blade cuts clean and the lawn stays greener.
5. **CHECK BROWN PATCHES** — Before you water more, look for grubs, armyworm or fungus. Spray what you find.
6. **PATCH BARE SPOTS** — Lay turf or runners while it grows fastest. Keep it moist until it roots.

THE YEAR-ROUND LAWN PLAN — *Get all four free at prolawnsau.com*

SPRING · **SUMMER** · AUTUMN · WINTER

HEATWAVE COMING? Don't feed or spray on a scorcher. Water deep the evening before, mow higher, and keep traffic off until it cools.

Always read the label before use and apply as directed. Timing suits most of southern and eastern Australia.
