WEED & PEST CALENDAR

Spray when the weed or pest is growing, and before it takes hold

Best time - easiest win **Still works** - go for it, see the tip **Quiet time** - not much happening **Keeps working** after one spray

WEEDS HERBICIDES - 2 PRODUCTS Clover, bindii, oxalis or nutgrass taking over?

MULTI TURF Broadleaf weed killer - 500 mL
TARGETS Bindii, clover, oxalis, cudweed, cat's ear, capeweed

Missed it? Weeds got bigger? Still spray, they just take a bit longer to die. Skip frosty mornings.

BEST TIME
Apr-May & Aug-Sep
STILL WORKS
Mar-Nov
KEEPS WORKING
~3 months

TEMPTRA 750WG Nutgrass killer - 25 g
TARGETS Nutgrass and Mullumbimby couch

Missed it? If the nutgrass is green and growing, it still works. Wait for 5 cm of new leaf.

BEST TIME
Nov-Feb
STILL WORKS
Oct-Apr
KEEPS WORKING
4-6 weeks

GRUBS & BUGS INSECTICIDES - 2 PRODUCTS Curl grubs, black beetle, armyworm or ants?

PRYNova 350WG Grub & caterpillar control - 100 g
TARGETS Curl grubs, black beetle larvae, armyworm, webworm

Missed it? Grubs already chewing? Still works, use the higher rate. Caterpillars: spray when you see them.

BEST TIME
Sep-Oct
STILL WORKS
Aug-Apr
KEEPS WORKING
Season-long

FIVESTAR Beetle & insect knockdown - 1 L
TARGETS Black beetle, billbug, armyworm, webworm, ants

Missed it? Spray whenever you see them. Check again in 3-4 weeks and go again if they're back.

BEST TIME
Sep-Nov & Feb-Mar
STILL WORKS
Sep-May
KEEPS WORKING
A few weeks

LAWN DISEASE FUNGICIDE - 1 PRODUCT Brown rings or spots after warm, humid weather?

CHLORTAN 720 Lawn fungicide - 1 L
TARGETS Dollar spot, brown patch, grey leaf spot

Missed it? Patches already showing? Spray now at the higher rate, then every 7 days.

BEST TIME
Dec-Mar
STILL WORKS
Oct-May
KEEPS WORKING
7-14 days

MISSED THE BEST TIME? YOU HAVEN'T MISSED OUT.

Best is when the weed or pest is easiest to knock out, so you use the least product. **Still works** means go ahead: it might take a bit longer or need the higher label rate. **Quiet** means the weed or bug isn't doing much, so save your money. Up north the warm season starts earlier and runs longer, so go by what you see in the lawn.

SPRAY DAY SAME RULES FOR ALL FIVE

1 CALM DAY

No wind, no rain due. Check each label for how many dry hours it needs.

2 MEASURE IT

Use the label rate for your area. More isn't better.

3 HOLD THE MOWER

Weed sprays: no mowing for 2-4 days after. Multi Turf: before as well.

4 HANDS OFF

Kids and pets off until it's dry. Gloves and eye protection to mix.

Always read the label before use and apply as directed. Timing suits most of southern and eastern Australia. Chlortan state limits apply.
